

# Fixed Income Taxable Short

## Investment Objective

The objective of the Fixed Income Taxable Short Duration composite is to emphasize shorter average maturity holdings with primarily investment grade credits. We manage these portfolios by keeping our duration in line with the duration of the benchmark index and making significant sector allocations when appropriate to add incremental returns to the portfolios.

## Investment Strategy

The short duration taxable composite emphasizes an overweight on investment grade credits, both financials and non-financials. In addition, there is some relative value in discount agency issues and some, although minimal, additional value in the MBS sector as well. We continue to keep our duration modestly shorter than the duration of the underlying benchmark index. Currently we also have a modest exposure to high yield through an index fund.

The Fixed Income Taxable Short composite was created on April 30, 2011 with an inception date of June 30, 2010. The composite seeks to provide a real return over a long period of time commensurate with the risk profile of the portfolio. The Fixed Income Taxable Short Composite pursues these objectives by investing primarily in income producing securities with a shorter duration profile with a maximum duration of 2.5. Securities held in this composite should be investment grade credits with average credit quality ratings of single A or better. The composite utilizes the Barclay 1-3 year Aggregate Index as the benchmark. The index does not include the effects of sales charges and cannot be invested in directly.

<sup>1</sup>To be consistent with Ancora's ADV filing, as required by the SEC for registered investment advisors, firm assets under management listed in this document reflect the values reported to the SEC. Ancora's GIPS® assets under management is \$2.80 billion as of September 30, 2018.

Investors should consider the strategy's investment objectives, risks and expenses carefully before investing. This and other important information about the strategy can be found in the strategy's GIPS compliant presentation. Please read the presentation carefully before investing. Valuations and returns are computed and stated in U.S. dollars. Gross returns are calculated gross of management and net of transaction costs. Net returns are calculated net of actual management fees and transaction costs. Both returns are calculated gross of all withholding taxes on foreign dividends. The composite results portrayed reflect the reinvestment of dividends, capital gains, and other earnings when appropriate. The pooled investment vehicle in the composite calculates net of fees returns net of all expenses including management fees and transaction costs. Policies for valuing portfolios, calculating performance and preparing compliant presentations are available upon request. Ancora's investment advisory fees are described in Part 2A of its Form ADV.
