Methods of Analysis, Investment Strategies and Risk of Loss

Methods of Analysis and Investment Strategies

RPA uses risk tolerance questionnaires, Plan profile forms and Client interviews to create a customized profile for each Plan. This profile is used to determine the type of investments, risk associated with certain types of investments and the proper allocation of investments in order to create a custom recommendation for each Plan.

Risk of Loss

Investing in securities involves risk of loss that Clients should be prepared to bear. Investment values will fluctuate both up and down, are subject to market volatility, and may be worth more or less than the original cost. All securities involve risk of the loss of principal. In addition, while we believe our methodology and strategies will be profitable, there is no assurance this will always be the case.

While a brokerage account may allow margin transactions, RPA does not recommend the use of margin. RPA wants our Clients to understand the risks of margin transactions and recommend that they read the broker dealer's written disclosure document describing margin trading and related risks.

Retirement Plan accounts are not eligible for margin transactions.

Invest in Same Securities Recommended to Clients

On occasion, Ancora employees may decide to transact in securities that are also transacted in Client accounts or may transacted in securities in which a related person may have some financial interest. This practice could create a conflict of interest if the transactions are structured to impact the market after the employee has transacted in the security. Our Code of Ethics and Personal Securities Trading Policy stipulates that our employees, with limited exceptions, may not transact in securities three days prior to or three days subsequent to the firm transacting in such securities for its Clients. Additionally, personal securities transactions for common stocks, ETFs, preferred stocks, ADRs, closed-end funds, options, IPOs, private placements and mutual funds for which an affiliate serves as the investment adviser or sub-adviser must be preapproved. Other blackout period restrictions on securities due to client trades and MNPI may be in place and are monitored by compliance. The CCO will review any exception requests and make a determination if one will be granted on a case by case basis and will hold ultimate authority on all exception requests.

Cross Trading Policies

A cross trade is a pre-arranged transaction between two or more accounts, each of which is managed by the same adviser. In some situations, the adviser may need to buy and sell the same security at substantially similar times and the adviser may determine that crossing the transaction is beneficial to both clients as opposed to exposing each individual trade to the current market.
