

Fixed Income Short Aggregate

Investment Objective

The objective of the Fixed Income Short Aggregate composite is to emphasize shorter average maturity holdings with primarily investment grade credits. We manage these portfolios by keeping our duration in line with the duration of the benchmark index and making significant sector allocations when appropriate to add incremental returns to the portfolios.

Investment Strategy

The Short Aggregate composite invests across a diversified portfolio of fixed income securities that seek to provide income and preserve capital. The primary focus of the strategy is sector allocation within investment grade corporate bonds, MBS securities, U.S. Treasury and Agency securities. The strategy may invest in other securities including non-investment grade bonds to enhance income.

The Fixed Income Short Aggregate composite was created on April 30, 2010 with an inception date of July 31, 2010. The composite seeks to provide a real return over a long period of time commensurate with the risk profile of the portfolio. The composite pursues these objectives by investing primarily in income producing securities with a shorter duration profile with a maximum duration of 2.5. Securities held in this composite should be investment grade credits with average credit quality ratings of single A or better. The composite utilizes the Bloomberg US Aggregate 1-3 Year Index, a widely recognized unmanaged index of bond prices which is representative of a broader market and range of securities than is found in the composite. The index does not include the effects of sales charges and cannot be invested in directly.

¹ To be consistent with Ancora's ADV filing, as required by the SEC for registered investment advisors, firm assets under management listed in this document reflect the discretionary values reported to the SEC. Ancora's GIPS assets under management \$2.45 billion as of March 31, 2025.

Past performance does not guarantee future results. All investing involves risk. Investors should consider the strategy's investment objectives, risks and expenses carefully before investing. This and other important information about the strategy can be found in the strategy's GIPS composite report. Please read the report carefully before investing. Valuations and returns are computed and stated in U.S. dollars. Gross returns are calculated gross of management and net of transaction costs. Net returns are calculated net of actual management fees and transaction costs. Both returns are calculated gross of all withholding taxes on foreign dividends. Composite data is portrayed and reflects the reinvestment of dividends, capital gains and other earnings when appropriate. Individual account holdings and performance may vary depending on factors including account size, client-imposed restrictions, the timing of client investments, market conditions, contributions, withdrawals and other factors. Policies for valuing portfolios, calculating performance and preparing GIPS composite reports are available upon request. Ancora's investment advisory fees are described in Part 2A of its Form ADV.
