

Micro Cap Value

Investment Objective

The objective of the Ancora Micro Cap Strategy is capital appreciation. Our goal is to exceed the Russell Microcap Index over a period which encompasses a complete market cycle. Furthermore, we aspire to produce returns which are superior to the index on a risk adjusted basis. Our focus is on undervalued stocks with market capitalizations in the bottom two deciles of the overall market.

Investment Strategy

The strategy employed is to construct diversified portfolios of microcap companies which are undervalued based on our proprietary "normalized return" approach or which are undervalued based on asset valuation. In addition, portfolio companies will normally possess above average balance sheets, positive insider activity and an identified potential catalyst. Many of the stocks may be underfollowed and unloved by Wall Street which provide upward revaluation potential as earnings and P/E ratios return to normal.

Performance

*Represents annualized performance from inception of 10/31/2008
Periods less than one year are not annualized

The Micro Cap Value composite was created on September 30, 2008 with an inception date of October 31, 2008. The composite contains U.S. traded equities, which offer substantial returns with corresponding greater risks. Securities will tend to be in companies that fall in the lowest two deciles of the market cap universe as defined by Fama/French. Prior to March 31, 2018, the universe for the composite was micro capitalizations typically less than \$500 million. The composite utilizes the Russell Microcap Index as the benchmark. The Russell Microcap Index is a capitalization weighted index of 2000 small and micro cap stocks that captures the smallest 1000 companies in the Russell 2000, plus 1000 smaller U.S based listed stocks. The pooled investment vehicle in the composite calculates net of fees returns net of all expenses including management fees and transaction costs.

¹To be consistent with Ancora's ADV filing, as required by the SEC for registered investment advisers, firm assets under management listed in this document reflect the discretionary values reported to the SEC. Ancora's GIPS assets under management is \$2.91 billion as of March 31, 2022.

Investors should consider the strategy's investment objectives, risks and expenses carefully before investing. This and other important information about the strategy can be found in the strategy's GIPS composite review. Please read the report carefully before investing. Valuations and returns are computed and stated in U.S. dollars. Gross returns are calculated gross of management and net of transaction costs. Net returns are calculated net of actual management fees and transaction costs. Both returns are calculated gross of all withholding taxes on foreign dividends. The composite results portrayed reflect the reinvestment of dividends, capital gains, and other earnings when appropriate. Composite data is portrayed. Individual account holdings and performance may vary depending on factors including account size, client-imposed restrictions, the timing of client investments, market conditions, contributions, withdrawals and other factors. Policies for valuing portfolios, calculating performance and preparing composite reviews are available upon request. Ancora's investment advisory fees are described in Part 2A of its Form ADV. This document does not constitute the recommendation of Ancora to meet the investment needs of any individual client. It does not take into account any specific investment objectives, financial situations, or particular needs of any specific person who may receive this report.
